

Connecting communities with enhanced BRT and rail stations.

BRT has become increasingly popular in cities across North America as transit agencies and municipalities focus on ways to streamline their systems and better connect people between and across communities.

Our BRT/Rail Series stations work in concert with modern communities implementing BRT and rail services. The stations' sleek lines and modern twist on traditional bus shelters result in a BRT/Rail Series that creates a stylish Sense of Place™ for fast-paced metropolitan cities. With options like solar-power, smart device connectivity, and digital advertising/information displays, your community will appreciate your commitment to innovation.

The BRT/Rail station series is both beautiful and well built, bringing a combination of purpose-driven design and unsurpassed durability to your passengers looking to connect with their community. Cutting-edge looks and quality craftsmanship... That's the Tolar Difference.

TOLAR'S DESIGN TEAM UNDERSTANDS:

The role that quality transit shelters and street furniture amenities play to connecting passengers with communities.

The practical approach to balancing costs with needs and desires.

A modular approach to leverage unique part cost containment for multiple transit shelter sizes.

Local building code requirements.

The need for a measurable Quality Control Plan.

How to efficiently work with your chosen engineering design firm(s) with specific experience in transit hardscape, ADA and technology integration.

Custom branding for success.

ON THE STREETS ACROSS AMERICA
(size and design examples)

DEL AMO, CA

Improving the rider experience for daily travelers.

Two, 30-ft high-capacity shelters feature high visibility branding, plentiful seating, low-draw LED illuminated media displays kiosk, under-roof security lighting, and real-time information signs.

CHARLOTTE, NC

Various Tolar-designed shelters greet riders as they begin their travels on BRT lines in their community.

This 16-ft Signature Sunset shelter sits along a streetcar line sporting custom art glass panels unique to each stop location. The shelters feature extra deep roofs, bronze tint heat-formed radius roof panels, wide and narrow end walls for specific location requirements, and electric security lighting in rear beam for passenger comfort.

BOSTON, MA
Nine BRT shelters in five distinctive Signature Sunset models make a modern statement.

36-ft x 7-ft BRT stations with 3/8-in cleat tempered glass, station location branding, LED illumination, housing for various amenities, slat benches, and agency branding marker.

GARY, IN

Incorporating public art into BRT lines creates a sense of community in streetscapes across North America.

This highly visible 10-ft totem-style route-branded kiosk is paired with modern yet durable, solar-powered BRT shelters that showcase public art in the rear wall with revenue-generating advertising on the side wall.

JACKSONVILLE, FL

Completely customizable BRT solutions with digital information kiosks.

15-ft Signature BRT shelters with back-to-back media display kiosk, and custom branding over perforated metal panels. Project also included 10-ft free-standing digital display kiosks with 32-in LCD digital screens in NEMA-rated enclosures with backlit LED map cases placed below digital screen.

SEATTLE, WA

Modern symmetry fits nicely within BRT station platforms, accommodating large volumes of daily commuters.

Signature Custom 9-ft and 17-ft aluminum-framed, angled flat roof BRT station shelters incorporate laminated glass roofs and walls.

CARLSBAD, CA
Sleek lines typify many BRT projects to align with modern bus rapid transit services.

25-ft long by 14-ft deep platform shelters sport a high strength steel and insulated standing seam metal roof with concrete wrapped support posts for added strength and durability. Amenities include under roof LED lighting and highly visible station signage.

ESCONDIDO, CA

High visibility branding plays a significant role in the fast-moving delivery of BRT solutions.

This 32-ft Signature BRT shelter is highly visible with agency branding, comfortable seating, and signaling beacon.

These styles are representative of product options within this series. Scan the QR code or visit www.tolarmfg.com for additional ideas, options and specifications.

NASHVILLE, TN

Custom passenger waiting areas for rail platforms result in bold solutions befitting the surrounding streetscape.

Peak BRT 16-ft shelter custom blends industrial and craftsman architecture with train station feel and 360 degree peripheral view of all surroundings from within the shelter walls.
