

THE TOLAR DIFFERENCE

Durability with Distinction

As North America's leader in the design and fabrication of award-winning, best-in-class transit shelters, solar solutions, street furniture and digital/information displays, Tolar Manufacturing Company has a reputation of delivering uniquely designed, quality-built products on time and on budget. This does not happen by accident. It's the result of the company's commitment to invest in purpose-driven design, top-notch materials sourcing and specifications, standardized fabrication processes and end-to-end quality control unmatched in the bus stop shelter and outdoor furnishings industry.

CONNECTING COMMUNITIES SINCE 1991

CONNECTING PASSENGERS

to Freedom of Travel

As passengers traverse your community by bus they may not always think about the important role bus shelters hold in connecting them to their destinations. Providing shade, restful seating, travel information, and security lighting, bus shelters establish a

rider's experience before ever stepping foot on the bus.

When it comes to building bus shelters for your passengers, we listen intently to your vision. This often leads to a collaborative sketch where we capture concepts that reflect the character of your community.

We then take that sketch to our in-house design engineers who translate your vision to a detailed drawing using the latest design and fabrication CAD software while also working closely with retained engineers licensed in all 50 states, territories and many Canadian Provinces. This double team approach provides our clients with the confidence in knowing that every Tolar built structure is in compliance with building codes throughout North America and that bus shelter each element serves its purpose.

Your Vision Is Taking Shape

Now that CAD drawing is off to fabrication, where the bus shelter is durably built in the U.S.A. with top notch materials and end to end quality controls.

Having the most diverse portfolio in the industry requires highly standardized processes. Each step taken by the Tolar team is governed by our extensive quality control manual, which is certified by the internationally recognized accreditation agency, Clark County (NV) Building Department and the stringent City of Los Angeles Department of Building and Safety. The Tolar Team understands that product knowledge, professional talent, hard work and a dedication to serve our clients are the essential elements required to successfully bring a project from concept to reality.

Next Step ... Your Community

Your vision—which started with a meeting and a sketch—is now a uniquely designed, quality built bus shelter, loved by your bus riders and connecting communities.

AMERICAN QUALITY FOR 30 YEARS

Your Community. Your Style.

Our expansive line of transit shelters are sure to transform your community's outdoor environment into a memorable public space that creates a true Sense of Place™. Our forward-thinking designers and experienced engineers have developed purpose-design elements that balance style with your customers needs resulting in modern amenities. Cutting-edge design and unsurpassed craftsmanship, combined with our lifetime structural warranty, that's what you can expect from our innovative, purpose-built transit shelters.

Signature Series

The perfect fit for bus rapid transit and distinctive community branding.

Niagara Series

Minimal parts and easy installation, make this a great choice for many communities.

Sierra Series

Provides design flexibility with ease of installation and maintenance.

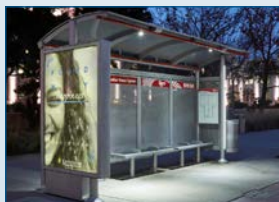

Euro Series

Ideal for modern cosmopolitan communities and bus rapid transit projects.

Bus Rapid Transit

A practical approach to BRT and rail, incorporating agency branding with rider comfort and safety.

Solar Solutions

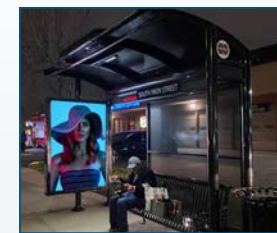

An environmentally responsible choice for illumination and other amenities.

SHOWCASING THE CHARACTER

OF YOUR COMMUNITY

Style for Today. Value for the Future.

SmartPlace™ Shelters

Leading the way with distinctive at-stop digital solutions that address growing passenger expectations, SmartPlace™ shelters offer cutting edge amenities in one stop. From real-time information in displays and free-standing kiosks, to revenue-generating

digital advertising, charging stations, close circuit cameras with optional audio, and more. And, with proprietary industry leading high-illumination, low-draw solar lighting systems that offer cutting edge LED and power management technology, our SmartPlace™ transit shelters are the smart solution for your community.

Street Furniture

Offering the perfect combination of style and sturdiness, our line of street furniture is sure to please your toughest critics. Whether you are looking for schedule holders or map cases to complement

your transit shelters, secure bicycle racks to add value to your BRT/Rail series project or you simply seek trash receptacles and benches for your newest public venue, Tolar's line of outdoor furniture will exceed your expectations.

Outdoor Displays

Our line of indoor and outdoor advertising displays adds dramatic visibility to your out of home advertising messages and critical directory information, whether for public transit shelter installations, lifestyle centers, airports

or more. From concept to completion, our experienced team develops a product that delivers on your message while complementing and enhancing the architectural aesthetics of the public space.
